top player from Google, AirBnB, you :)

\$40-\$49

\$6300-\$7800

Your monthly fee will include your Developer's salary + company monthly fee (1200 USD + 10% gross salary).

Why Datarob

A **transparent** dedicated model

We don't hide the salaries of your developers. In their turn, your developers will know that it's YOU who pays them. It will be YOUR OWN development team, so you can promote your **culture** and share your **vision**.

Maximum dedication and focus on **remote** work

Our main goal is to create an environment where developers feel like they are **a part of the Client's company**. We've been practicing efficient remote work and communication long before Covid-19.

PROACTIVE hiring

We don't rely on a typical post-a-vacancy-and-wait approach. We use **every method in our power**, from lead generation to hiring top candidates directly. With such an approach, we stand a good chance at **hiring fast**.

An **all-inclusive** pricing package

All expenses will be included in your monthly rate: an office space, comfortable workplaces with modern PCs, IT infrastructure, recruitment & HR, account management, employees' bonuses, vacations and sick days.
